IOGCC Hot Topic Issues background Region 9 CA UIC tt edits.docx

Hi David, good idea to use material we have already put together in the past; the information in the paper seems adequate. Some of the key facts could be presented a bit more crisply/succinctly and organized in bullet form. I took a stab at one way to do it, but you may have other ideas and I think most of the information is already in the paper (i.e., 1 page should be good). Thanks

Tomás

Subject: Background on CA UIC issue

Hi Tomas,

Attached is an issue paper we put together for HQs in preparation for an upcoming IOGCC (Interstate Oil and Gas Compact Commission) meeting that EPA is participating in. I'm thinking this would also be good background to send to Alexis prior to the briefing/call with Pavley this week. Let me know. Thanks, David
